

Test organism's UMAP projection in metabolic space

Overlap between unique EC numbers

2.5

kNN Metrics

kNN distance percentile: 97.3% → Out-of-distribution (very distant)

LOF percentile: 73.1% → Normal local density

Overall assessment: Distinct but coherent metabolic niche

Media usage of neighboring taxa:

J84 (occurrence: 31.2% of neighbors): GAM broth, Agar, Distilled water

J13 (occurrence: 25.0% of neighbors): Lab-Lemco beef extract, Proteose peptone no. 3, Trypticase peptone, Phytone peptone, Yeast extract, Liver extract, Glucose, Starch, Tween 80, Agar, L-Cysteine HCl x H₂O, Horse blood, Distilled water, K₂HPO₄, KH₂PO₄, Distilled water, MgSO₄ x 7 H₂O, NaCl, FeSO₄ x 7 H₂O, MnSO₄ x n H₂O, Distilled water

1076b (occurrence: 18.8% of neighbors): PPLO broth, Tryptone, Bacto peptone, Distilled water, DNA, CMRL 1066, Yeast extract, Fetal bovine serum, Swine serum, Glucose, Urea, Agar

J346 (occurrence: 18.8% of neighbors): Yeast extract, Proteose peptone no. 3, Casamino acids, Glucose, Starch, Sodium pyruvate, K₂HPO₄, MgSO₄ x 7 H₂O, Agar, Distilled water

1012a (occurrence: 6.2% of neighbors): Nutrient broth, Casamino acids, Yeast extract, Agar, MgCl₂ x 6 H₂O, CaCl₂ x 2 H₂O, Distilled water

Shared ingredients:

Components shared by at least two media:

Agar, Casamino acids, Distilled water, Glucose, K₂HPO₄, MgSO₄ x 7 H₂O, Proteose peptone no. 3, Starch, Yeast extract

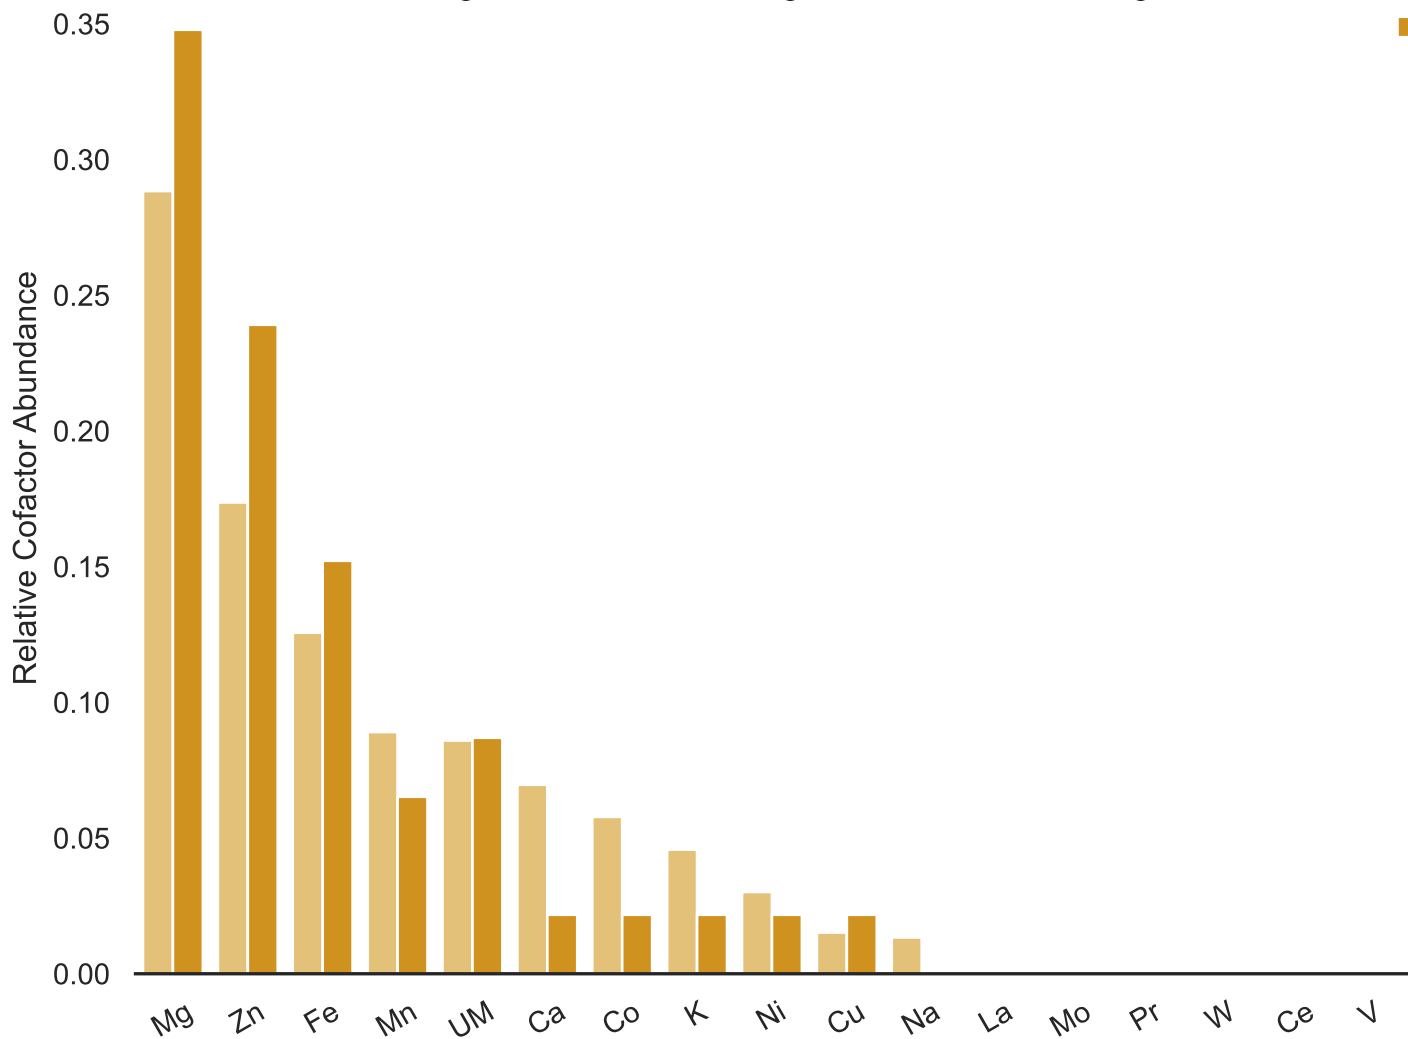

Components shared by all media:

Agar, Distilled water
